

# Longpass filter for fluorescence applications - Lens filter

- Lens filter with filter thread M30,5x0,5
- high-quality longpass filter
- various threshold wavelengths available
- high transmission over 90%

*Price list: page 396 of the  
 main product catalogue*

- for best results, we recommend the combination of lighting and lens filters  
 ↪ suitable lens filters can be found starting on page 235 in the main product catalogue
- coordinated filter combinations enable a precise separation of stimulation and emission wavelengths
- UV reflections from the lighting and extraneous light influences are suppressed
